

Philip Jordan

PhD Student in Computer Science, EPFL

 Email  Publications  Website

EDUCATION

- | | |
|-----------------|--|
| 09.2024-present | Ph.D. in Computer Science , École Polytechnique Fédérale de Lausanne (EPFL), CH.
Advisor: Prof. Maryam Kamgarpour. |
| 2021-2023 | M.Sc. in Computer Science , ETH Zürich, CH.
Theoretical Computer Science (major), Machine Learning (minor).
<i>Graduated with distinction (GPA 5.77/6.0).</i> |
| 2017-2021 | B.Sc. in Computer Science , ETH Zürich, CH.
Exchange semester at Princeton University, USA. |

PUBLICATIONS

- | | |
|--------------|---|
| ICML'26 | <i>Nash Equilibria in Games with Playerwise Concave Coupling Constraints: Existence and Computation.</i>
Philip Jordan, Maryam Kamgarpour.
Selected for oral presentation (top 0.7% of submissions). |
| under review | <i>Independent Learning of Nash Equilibria in Partially Observable Markov Potential Games with Decoupled Dynamics.</i>
Philip Jordan, Maryam Kamgarpour. |
| under review | <i>Model-Based Learning of Near-Optimal Finite-Window Policies in POMDPs.</i>
Philip Jordan, Maryam Kamgarpour. |
| AISTATS'24 | <i>Independent Learning in Constrained Markov Potential Games.</i>
Philip Jordan, Anas Barakat, Niao He. |
| AAMAS'24 | <i>Decentralized Federated Policy Gradient with Byzantine Fault-Tolerance and Provably Fast Convergence.</i>
Philip Jordan, Florian Grötschla, Flint Xiaofeng Fan, Roger Wattenhofer. |

TEACHING

- | | |
|-----------|--|
| 2025-2026 | Supervision of two semester projects on <i>Competitive Multi-agent Reinforcement Learning and Learning Algorithms for Zero-sum Games with Coupling Constraints</i> , EPFL. |
| 2025-2026 | <i>Multiagent Decision-Making and Control</i> , Teaching Assistant, EPFL. |
| 2025 | <i>Foundations of Artificial Intelligence</i> , Teaching Assistant, EPFL. |
| 2018-2020 | <i>Discrete Mathematics</i> , Teaching Assistant, ETH Zürich. |

INDUSTRY EXPERIENCE

- | | |
|------|---|
| 2022 | Co-founded Swiss company <i>OpenSwap Technologies AG</i> , leading responsibility for design, implementation, and audit of smart contracts powering a decentralized finance platform, total trading volume > 1 billion USD. |
|------|---|

STUDENT COMPETITIONS

- | | |
|-----------|---|
| 2016-2017 | Finalist (top 1%) in the 35 th and 34 th <i>National German Computer Science Competitions</i> . |
|-----------|---|
